

Imagine Charter School Students' Hard Work Seen on PARCC Assessments

Colorado State Assessment data suggests that students at Imagine Charter School are working incredibly hard to grow in both Math and English Language Arts.

“It is essential to us that students grow and that we are moving more and more students to the proficient and advanced categories on the Colorado State Assessment (PARCC),” said Jessica Cervantes, Imagine Charter School’s 5-8 Grade Principal. “Our data showed that we achieved this goal in third – eighth grade in both English Language Arts and Math.”

In addition to proficiency, Imagine looks at growth and how the school compares to other schools across the district and state. This is important as it allows administration and teachers to gain a better understanding of trends and where to focus in the coming years. Below you will find how Imagine stacks up to the other schools in the area and across the state. Imagine’s data is represented by the grey bar at each grade level.

“Looking at this data, allows us to focus on the best way to help our students in the 2017-2018 school year and beyond,” said Cervantes. “As a school we’ll continue to look into how to best support our students and help them grow in both English Language Arts and Math, with particular focus on Math proficiency.”

Preparing students for high school, college, and beyond is imperative at Imagine Charter School. Knowing that each student is different, teachers and staff find ways to differentiate instruction and help student be successful at their level. Through this intentional, thoughtful process, teachers and staff are confident that students will be prepared for their future.
