Admin Corner

Every month, we will be focusing on one of the eight multiple intelligences. This month's M.I. focus is:

**Naturalistic
OR
NATURE SMART**

What does it mean to be "nature smart"? Individuals who are "nature smart" learn best when there are outside interacting with nature. They also enjoy taking nature walks, going camping or gardening. Students who are nature smart love learning about topics such as weather, plants, and animals. These individuals will probably be interested in careers in science or the environment.
