

CELLPHONES

Created By : Alexander and
Elissa

THE FIRST PHONE

The first phone was created by Alexander Graham Bell but he was not able to make a phone call. Later on a man named Martin Cooper innovated the phone and made it possible to make a phone call.

HOW THE PHONE WAS ORIGINALLY USED THEN AND NOW

The phone was originally used to conduct conversation between two people. Now phones are used to send text, take pictures, use internet, and having conversations over the phone.

THE TIMELINE OF PHONES

Going Mobile | The evolution of the cellphone

1982
Mobira Senator
Finnish company Mobira Oy, a precursor to Nokia, introduced its first car phone, the Mobira Senator NMT-450. It weighed about 22 pounds.

1984
Motorola DynaTac 8000x
The first cellphone to be offered commercially hit the market priced at \$3,995 (\$9,237 in 2012 dollars) and weighed just under 2 pounds.

1987
Mobira Cityman
One of the world's first handheld phones, the Cityman weighed 28 ounces with the battery.

1989
Motorola MicroTac
Initially manufactured as an analog cellphone, the MicroTac was an early example of a flip phone, in which the mouthpiece folded over the keypad.

1992
Nokia 1011
The first digital handheld phone, the Nokia 1011 would become the company's best-selling phone ever.

1993
BellSouth/IBM Simon Personal Communicator
First phone with a touch screen and smartphone features (pager, calculator, address book, send/receive faxes, games and email). Cost about \$900.

2000
Ericsson R380
The first device marketed as a smartphone.

2002
BlackBerry 5810
Made by Research In Motion, the 5810 was a cellphone with organizer functions and a keyboard for thumbs; a wired headset was mandatory.

2004
Motorola Razzr
Was part phone, part fashion accessory. In the Razzr's first four years, Motorola sold more than 110 million units.

2007
Apple iPhone
Hundreds of people lined up outside Apple stores to buy the first iPhone, priced at \$499 (4GB) and \$599 (8GB).

The Wall Street Journal

The original cellphone was created in 1984 it was very expensive back then because it was the first phone ever created. Then in 1989 the phone was innovated and it was like a flip phone because the place where you speak into folded over the keypad. In 2004 there were more than 1 million units were in the Razzr's in the last four years. In 2007 they made the first Apple iPhone and hundreds line up for the iPhone.

WHAT AREA OF TECHNOLOGY BEST CLASSIFIES THE PHONE

Information and communication is what the phone best classifies the phone because it was originally created to communicate from one place to another. Now people can get information from the internet and communicate and such more.

WHAT ARE PHONES CAPABLE OF BACK THEN AND NOW

Old phones are capable of communication over a distance. Modern phones are capable of much more than back then. Modern phones send and receive text messages, email, photos, videos and such more. Built in to the modern phone.

THE POSITIVE WAY OF USING CELLPHONES IN SOCIETY

The cellphone was used to make sure the no one is hurt. It is also used to know where someone is when they are lost. These are some examples : Entertainment , GPS , Internet , commutating , and messaging .

THE NEGATIVE THINGS ABOUT A CELLPHONE

The negative things about the phone are : eye cancer, vision loss , waste your time , random people call , fills your brain with nonsense , and is easy to break .

THE END
