

Lifeline Education Charter School contracts with a Security Company that specializes in school safety. All campus visitors must sign in and out. The students are personally known by the security officers.

Campus Administrators at all three sites routinely inspect the campuses and visit classrooms in order to ensure students safety. The teachers, administrators, and staff remain visible standing outside the classrooms and in the hallways immediately before and after school and during passing periods. The School Safety Plan is adhered to as evidenced through professional development agendas and annual drill calendars.
