

Internet Acceptable Use Guidelines

We are pleased to offer the students of Cascade Union Elementary School District access to the Internet. All students must obtain and return a parental permission form before they will be allowed Internet access.

Student Guidelines

During school, teachers will guide their students toward appropriate sites and materials. The network is provided for students to conduct research, verify information, and publish results.

Network access is given to students who agree to act in a responsible manner.

Parent permission is required, and parents must agree to a waiver of claims and indemnification/hold harmless provision, which is on the permission form.

Access is a privilege – not a right. Access entails responsibility.

Students using the network are not permitted to

Use the Internet for anything other than its intended purpose to access, research, and exchange educational materials relevant to classroom instruction.

Access or transmit materials that do not meet school standards: text, files, images which are pornographic, vulgar, abusive, violent, offensive,
