

Apple Mobile Learning Labs

Higher achievement on wheels.

Roll digital learning into any classroom.

With the innovative Apple Mobile Learning Labs, it's easier than ever to bring a digital learning environment into every classroom. Designed specifically for schools, Apple Mobile Learning Labs provide teachers and students flexible, affordable, and convenient access to technology. Research shows that the more access students have to technology-based learning, the greater their engagement and achievement.

The best mobile technology for schools.

The comprehensive Apple Mobile Learning Labs include lightweight and durable MacBook computers; AirPort Extreme wireless networking for easy communication, research, and collaboration; the iLife software suite of integrated digital media tools; Apple Remote Desktop for easy classroom management; and a laser printer. All of these powerful learning tools are safely contained in a sturdy mobile cart that also serves as a secure charging station. And because the mobile labs turn every classroom into a computer lab, traditional dedicated computer labs can be turned back into valuable classroom space.

Innovative mobile cart design.

Built exclusively for Apple by Bretford, the mobile carts feature a streamlined design that makes them easier to use and move around campus. An improved power management system with power outlets at the front of the cart enables safe and easy removal, replacement, and charging of up to 32 MacBook computers. The individual dividers that store and secure each computer can be reconfigured easily, so teachers can customize the mobile cart to their classroom needs. And the carts are completely assembled, so setup is quick and simple.

Essential guide for getting started.

Provided with every Apple Mobile Learning Lab is a "Getting Started" guide. It's designed to help teachers integrate the mobile lab's powerful digital tools into their classrooms. Written by experienced educators, the guide includes valuable information about setting up and using your mobile lab, classroom management tips, templates, and more.

Value-priced solutions to raise student achievement.

Developed as the perfect companion to the Apple Mobile Learning Labs, the Apple Digital Learning Series provides schools with standards-based educational software and tools for engaging digital learning in the classroom. These solutions were evaluated and recommended by educators, and are designed to help schools enhance their curriculum, inspiring students to higher levels of achievement. Choose from a variety of solutions for language arts, math, science, and technology.

"We use the Apple mobile labs and the Apple notebook computers quite heavily in our science, social studies, and English classes. In those classes, we saw that the students were really engaged by the project-based learning model, and were working very collaboratively."

Staff Developer and Technology Specialist,
Fremont High School, California

[The most versatile, durable, and easy-to-use mobile labs.](#)

[Key features:](#)

[MacBook computers](#)

Lightweight, durable, and ideal for student learning, these full-featured notebooks offer powerful performance and a battery life that can last up to 6 hours on a single charge.¹

[AirPort Extreme wireless networking](#)

Easy to set up and built into every Mac, AirPort Extreme lets students conveniently and quickly access the Internet, print, or collaborate on projects from anywhere in the classroom.²

[Mac OS X](#)

Reliable and stable computing environment provides a safe, secure, and easy-to-use platform, so the focus in the classroom is on learning, not the technology.

[iLife '06](#)

A highly integrated software suite that comes on every Mac, iLife offers a flexible set of creative, user-friendly digital media tools that can inspire learning in any curriculum area.

[Redesigned mobile carts](#)

The streamlined design includes improved power and cord management, additional power outlets for accessories on the top, an automatic charging timer, and three-point locking doors for greater security. Two storage bins help keep accessories organized.

Powerful digital learning tools in any classroom.

The innovative Apple Mobile Learning Labs provide schools with affordable and flexible solutions for transforming any classroom into a powerful digital learning environment. Choose one of the preconfigured, value-priced Apple Mobile Learning Labs or create your own custom mobile lab that's just right for your school.

Apple Mobile Learning Labs

Each mobile lab includes: 10 or 20 MacBook computers, a Bretford 20 or 32 Laptop Mobility Cart, AirPort Extreme Base Station, Apple Remote Desktop software, and an HP LaserJet P2015dn Ethernet laser printer.
