

Computer Aided Design

Instructor: Mr. Eberly

CAD I & II is a year-long course offered to juniors and seniors intended to offer students an idea of the many careers available in the field. Topics covered include 2d and 3d mechanical engineering and modeling concepts, architecture, animation, and even 3d plastic printing. An articulation agreement with Wor-Wic offers 3 credits to students who pass CAD I & II with a “B” or better. Many different softwares are utilized to prepare students for possible future careers including:

CAD draftsman/operator

Graphic Design

Architect

Mechanical Engineer

Civil Engineer

Animation/Special Effects

CNC Machine Assistant
