

Parents,

Our school uses CrisisGo's Bully & Tip reporting tool, which allows our staff to report any safety incidents, including bully-related activity, directly to the school safety team. This tool is part of CrisisGo's app, which transforms smartphones and other mobile devices into safety assistants.

There is also a student version of the app called Safe2SpeakUp. This app allows our students, your children to submit safety tips to our safety team. Whether students have experienced a bully firsthand, observed bully-related activity, or have noticed a safety threat on campus, every student with the Safe2SpeakUp app will have the ability to let the right people know about it.

Students using the Safe2SpeakUp app can confidently report safety risks with the option of remaining anonymous. This provision allows students to do the right thing while remaining discreet. The app also features message groups that allow students to receive emergency information directly from the safety team.

CrisisGo believes that safety is a shared responsibility, and having every student and staff on board will help us keep our school safer. We encourage you to talk with your children about the Safe2SpeakUp app.

How to get started:

1. Your child can download the Safe2SpeakUP app from Google Play, Apple's App Store, or Chrome Web Store.
2. Their account username and password will be created through our school's implementation process, and school administration will be able to provide them with their username and password.
3. After logging in, they will automatically have access to the tips and message groups available. They will also receive emergency communications from school on their smartphone if an incident occurs.

Don't forget, you can be a part of the safety solution as a parent by downloading the CrisisGo app.
