

## How to Find Your Device's Name

### Microsoft Windows Vista & 7

1. Open System by clicking the **Start button**, clicking **Control Panel**, clicking **System and Maintenance**, and then clicking **System**.
2. Under **Computer name**, domain, and workgroup settings, you can find your computer's name, and its full computer name if your computer is on a domain.

### Microsoft Windows XP

1. Right click the **My Computer Icon** and select Properties
2. Click the **Computer Name** tab at the top of the screen
3. Your computer name is listed under **full computer name**.

### Mac OS X

1. Choose **Apple menu > System Preferences**, and then click **Sharing**.
2. The computer name appears at the top of the window.

### iOS (for iPads, iPhones, iPods)

1. On the home screen, tap **Settings > General > About**
2. The device name is at the top of the screen under **Name**

### Android Tablets

1. Tap the **Apps drawer** in the top right corner.
2. Tap on the **Media Server** app.
3. Under Media Server **enable Share contents** by tapping **On** located to the right.
3. Device name will appear along with the current name.

### Kindle

1. Open a web browser and go to Amazon.com.
2. In the upper-right corner of the web page, select Your Account
3. Scroll down to the **Digital Content** section. Under **Digital Management**, select **Manage Your Kindle**.
4. Input your credentials to login to your account.
5. On the left side of the page, locate **Your Kindle Account** and select **Manage Your Devices**.
6. Locate your device and click **Edit** (next to the device name). The device name will appear on this screen

## How to Find Your Computer's MAC Address

### Windows Method 1: Using the Command Prompt

1. Click on the **Start** button.
2. Do the following
  - a. **For Windows Vista or 7:** Type **cmd** in the search bar, right above the Start button, and press **Enter**. This will open the command prompt.
  - b. **For Windows XP:** Click Run. In the Run box type **cmd**. This will open the command prompt.
3. At the command prompt, type **ipconfig /all** and press **Enter**. Don't forget the space.
4. Under the section marked **Wireless LAN adapter Wireless Network Connection**, look for **Physical Address**. This your MAC address. Copy this down as it appears.

*Note:* Your MAC address **always** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).

### Mac OS X Method 1 (Older Versions)

1. Go to **Apple Menu > System Preferences**.
2. Select **Network**
3. Double-click on **Airport**
4. Find your **Airport ID**. This is the MAC address. Copy this down as it appears.

*Note:* Your MAC address **always** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).

### Mac OS X Method 2 (Newer Versions)

1. Click on the **apple icon** on top left corner of your screen.
2. Scroll down to **System Preferences** and click on it.
3. Select **Network** and choose **AirPort**
4. Click **Advanced** and navigate to the bottom of the page. There you will see the **AirPort ID**. This is the MAC address. Copy this down as it appears.

*Note:* Your MAC address **always** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).

### iOS (for iPads, iPhones, iPods)

1. On the home screen, tap **Settings > General > About**.
2. Then scroll down until you see **Wi-Fi Address** and Bluetooth.
3. The "**Wi-Fi Address**" setting is your iPad MAC address. Copy this down as it appears.

*Note:* Your MAC address **always** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).

### Android Tablets

1. On the Home screen, tap the **Menu key** and go to **Settings**.
2. Scroll down and tap **About Tablet** then tap **Status** and then scroll down to view **Wi-Fi Mac address**. Copy this down as it appears.

*Note:* Your MAC address **ALWAYS** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).

### Kindle

1. On the Home Screen, press the **Menu** button.
2. Go the **Settings** page.
3. Use the Kindle's 5-way controller to underline "**Setting**" and press. You will see multiple pages of personalization settings to customize your Kindle experience
4. Look for **Device Info** to get your Kindle's **Wi-Fi Mac address**. Copy this down as it appears.

*Note:* Your MAC address **ALWAYS** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).

### **Nook Simple Touch / Nook Color / Nook Tablet**

1. Tap on **Settings**.
2. Tap on **Device Info**.
3. Tap on "**About your Nook**"
4. The **Wi-Fi MAC address** is the MAC address you are searching for. Copy this down as it appears.

*Note:* Your MAC address **always** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).

### **Blackberry Playbook**

1. On PlayBook home screen, tap **Settings** icon on status bar
2. Tap **WiFi** on the left menu
3. At the bottom of the screen, tap **WiFi symbol icon with "?"** mark on it
4. Here you can find MAC address named as **Physical address**.

*Note:* Your MAC address **always** has 6 pairs of 2 numbers, like 01-22-C3-D4-E5-F6. The numbers will always be between 0-9 & A-F. The MAC Address **never** looks like 00-00-00-00-00-00-E0 (way too many zeros, and too many numbers) or 44-44-45-44-44-44 (that's your modem).
