

# How to update the software on your Mac

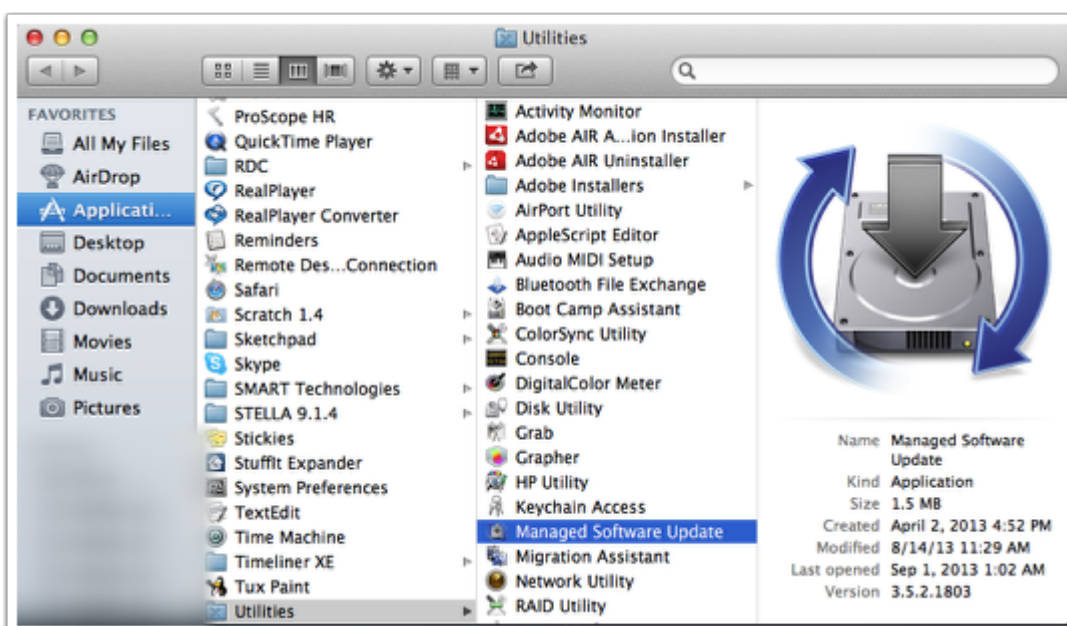

## Step 1:

With your new teacher laptops you will be able to update software that we push out on your own. To do this go to the "Go" menu in the Finder and click "Utilities".

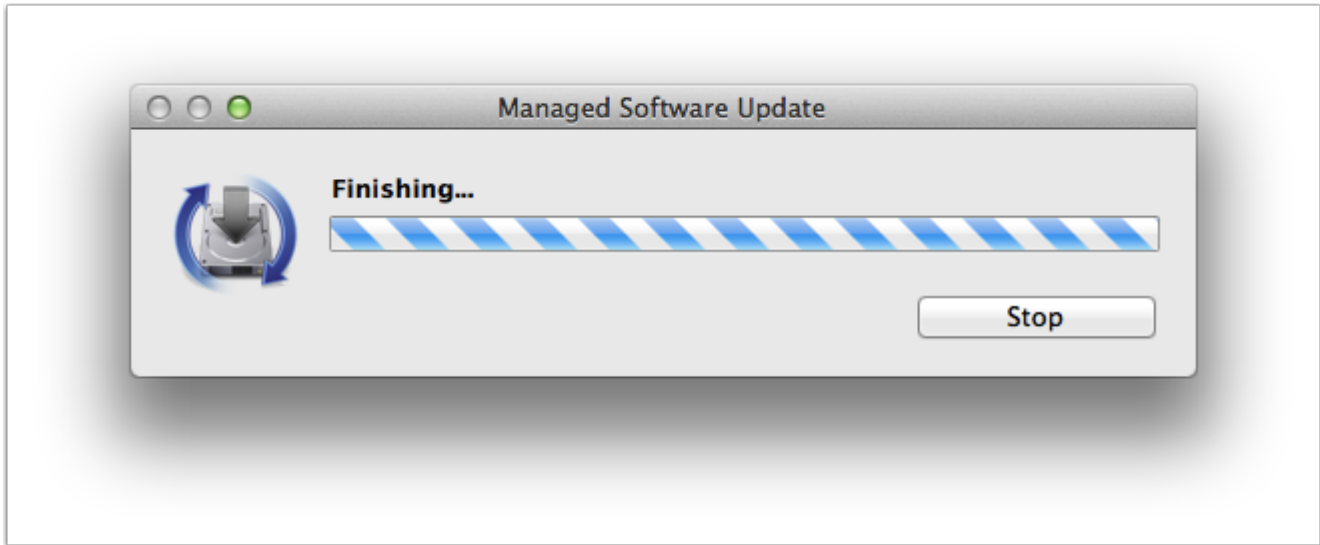

## Step 2:

This will open the Utilities folder, once there open "Managed Software Update"

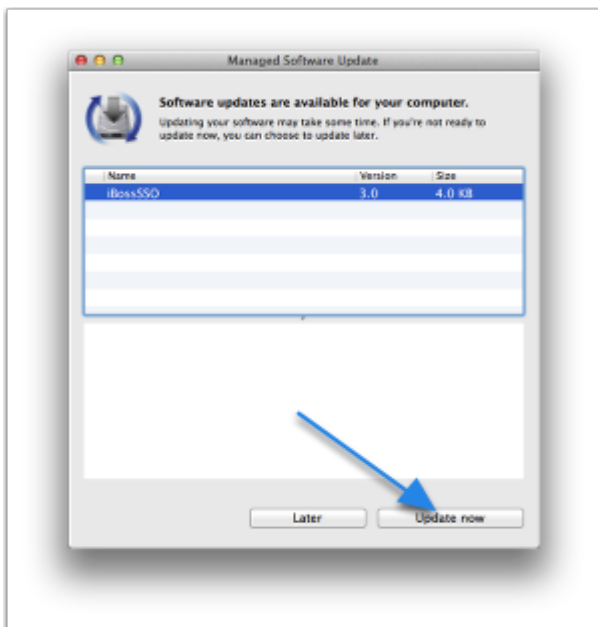

## Step 3:

You will see Managed Software Update check to see if there are any available updates.

## Step 4:

If there is an update you have the option to "Update now" or "Later". To install the update click "Update now"

## Step 5:

Next you will be asked if you want to "Cancel" the install "Update without logging out" or "Log out and update". It is best practice to "Log out and update". After you click the, Log out and update button your computer will log you our and begin to install any updates.
