Admin Corner

Every month, we will be focusing on one of the eight multiple intelligences. This month's M.I. focus is:

Visual-Spatial or PICTURE SMART

What does it mean to be "picture smart"? Individuals who are "picture smart" learn best when they look at images, notice color, patterns and objects instead of words or phrases. (i.e. artists, sculptors, painters, computer animators, graphic designers, photographers, and art teachers).
