

How Is My Child Doing in ST Math?

1

When students first log in, the objective they are working on is shown. To see the progress in that objective, hover over the cone until a percentage appears.

2

To see the overall progress through the curriculum, hover over the bar underneath the grade level.

3

For more specific data, select the data icon.

4

Selecting the globe shows the **Overall Progress** through the entire curriculum. This graphs the percent complete and the number of sessions.

5

Select the **Mastery** tab to see the **Standards Mastery** score. This is based on the post-quiz scores and completion rates.

6

If your school has access to Fluency, click on the Fluency tab to see the **Mastery** score. Don't worry; it takes several introductory sessions before fact mastery begins. Students should work for 100% mastery.

Progress can be viewed for past objectives by clicking on the cone icon at the bottom of the screen.

Choose the objective.

Click on the graph icon.

The cone tab shows the rate of progress through the objective.

To see quiz scores, select the graph icon at the bottom of the screen. The thinner bars show how confident the student was about the answers given.

12

Pre-quiz		Post-quiz	
1	✓	1	✓
2	✓	2	✓
3	✗	3	✓
4	✗	4	✓
5	✗	5	✓
6	✓	6	✓
7	✗	7	✓
Score:	43%	Score:	100%
Y Score:	60%	Y Score:	100%

For a quiz item analysis, select the table icon. The icon indicates the student was sure of the answer.

So what can you do with this information?

- Most importantly, encourage your child and focus on successes.
- Open a completed objective with your child. Open up some games. Ask your child to play the games and to tell you how they are “winning”. Listen for their thinking processes.
- Go over the data with your child. While quizzes can’t be viewed or retaken, low scores mean your child would probably benefit from replaying the games in that objective. Ask which games were most challenging. Replay these games.
- Encourage your child to take time and put in effort when taking the quizzes.
- Look for learning trends when looking at objective progress. A steep line indicates the student moved quickly through the games, while a more flat line indicates the student may have struggled.
