

The Super3 Research Method (Grades K–2)

The **Super3** is an information problem solving model for children in grades K through 3 based on the **Big6**. It gives students a process for tackling both school and everyday tasks.

1. Plan (Beginning)

What am I supposed to do?

What do I need to make to show what I learned?

2. Do (Middle)

What kind of information can I find?

Where can I find print and non-print information?

Choose the best print and non-print sources.

Organize the info using a graphic organizer.

Create presentation.

3. Review

Did I do what I was supposed to do?

Do I feel OK about this?

Should I do something more before I turn it in?
