

Early Childhood Education and Extended Day Programs

Honoring the Image of the Child

**In partnership with families, teachers and peers,
all children will have opportunities to investigate, experience, explore
and collaborate to build knowledge across all domains.**

2017 – 2018 School Improvement Goals

Goal 1 (ECE)

All teachers will plan and use provocations, based on children’s interests, to extend children’s experiences, support project work and promote higher level thinking skills.

Goal 2 (ECE)

Increase children’s language learning potential through literacy-enriched environments, developmentally appropriate materials, experiences, and teaching strategies to encourage early forms of reading and writing.

Goal 3 (ECE/EDP)

Increase STEAM focus in Early Childhood Education classes and Extended Day programs to tap into children’s natural curiosity about the world, integrate knowledge across disciplines and support the value of learning through investigation and hands-on active engagement.

Goal 4 (ECE/EDP)

To support our growth, we will build capacity for teams to work together with positive and professional intent to best meet the needs of children.
