

Strategic plan 2017-18 Purpose and Direction

In the Spring of 2013 the District invited a group of stakeholders to revisit the District mission and vision. In that series of meetings, the emphasis was to identify the main purpose of the work in Sweetwater County School District #2. Through discussion it became obvious that the stakeholders recognized “Learning” as the main purpose of the system. As a result, the stakeholder group devised and committed to its mission as “Learning for All.” Extensive dialogue created an understanding as to how the new mission looked as it effected the entire district including students and staff as well.

In the same series of meeting the group of stakeholders also spent time around its direction, its vision. In discussing what the district would hope to become, the group spoke to the desire to inspire people to do their best every day. At the end of the sessions the new district vision was settled with “Inspiring Excellence Every Day.”

Building principals led their individual buildings in similar dialogue after sharing the district mission and vision. Each building created its own purpose and direction statement and revisits that process every fall.

SWEETWATER COUNTY
SCHOOL DISTRICT #2

District Mission: Learning for All

District Vision: Inspiring Excellence Every Day

District Goals:

Improve wellness and safety

Improve student achievement

Improve communication and collaboration
