

Hook GT Lesson

We are working on News Show Production in GT pullout. In this task, the students will explore content, format, and production aspects of a news show. Students will learn about informational writing and practice thinking critically when analyzing news stories. Students will compare objective news stories with persuasive, opinion/editorial writing. The final product will be the production of a news show complete with content from local Hook news using the green screen to film.

I know that our current News is not always what we like to watch, or let our children watch. I am asking special permission for you to let your student watch the news of your choice so that they can answer the questions on the paper that is attached. We will discuss these questions on Wednesday.

If you have any questions or concerns, please send me an email emily.coffee@sவில்le.us
