

# English Department Course Sequences

## Important Items to Consider During Programming:

\*\* All Honors and AP Courses require summer reading and/or assignments in preparation for the coming school year. Summer work is distributed during the spring, so students have the opportunity to obtain the required books and plan for how they will complete the required work on top of any other responsibilities they may have during the summer break. Students who fail to complete this work should expect their grades reflect the lack of work completion.

\*\* Students considering moving into an honors or AP level course are strongly encouraged to discuss their programming choice with their current English teacher along with their Guidance Advisor.
