

## **Medical Lake School District's Emergency Preparedness (Summary)**

**Our goal is to have a safe and secure learning environment for your child. Safety and education go hand in hand. Safety is everyone's responsibility: teachers, students and parents. We coordinate with law enforcement, the fire department as well as other outside agencies to anticipate any safety concerns.**

**We have a comprehensive emergency response plan and frequently conduct drills for maximum preparedness. Our staff and students receive safety training, and they are part of the safety system.**

**We use a variety of technology to communicate with parents and the public. We use Skyward system to send messages. These messages are sent as a text or email. The messages are backed up by automated calls and written letters. The media continues to be a partner in our communication.**
