

WELLNESS AND HEALTH SERVICES**FFAA****HEAD LICE**

Students exhibiting symptoms related to head lice shall be referred to the school nurse for inspection. Symptoms may include, but not be limited to: itching of the head or scalp or appearance of lice or nits.

Inspection will take place in the health office or other designated area to promote confidentiality. If evidence of head lice or nits is found, the school nurse will take the following precautions:

1. Call the parent/guardian to request that their child be picked up from school effective immediately, and follow the recommended FDA approved treatment and elimination of lice and nits before the child will be allowed to return-the following school day if treatment is complete.
2. Upon review of the situation, the nurse will send a letter home to parent(s) or guardian(s) of other students who are assigned to the same elementary classroom as the child with lice, not later than the fifth day of school after the date on which the nurse determines or becomes aware of that fact.

District officials may readmit a child to school the following day after the appropriate procedures and FDA approved treatment has been followed. Upon readmission the student is to report to the health office for a verification of treatment, student will be allowed to report to class if there are no lice or nits present.

This policy requires that all lice and all nits be removed before the student can be readmitted to school.
