RE: Discover Jiangsu Program JESIE, China

Dear Brian,

On behalf of the JESIE staff I would like to express to you my sincerest gratitude for entrusting us with the students.

This was the first group to go through our new program, and the success of the program is owed in a large part to the participation of the distinguished American students. They were all extremely well behaved and very respectful of Chinese culture and traditions. Not only did the students participate in numerous educational classes and activities, but they also were able to experience many aspects of the province of Jiangsu. The American students made a lasting impression on not just their host families, teachers, and JESIE staff, but on the entire province of Jiangsu. They represented their nation very well, something the American people should acknowledge.

We hope that the students will remember this experience and take away an understanding and appreciation of the warmth and beauty of Chinese culture. Once again thank you for trusting us despite the absence of a program track record. We look forward to seeing our American friends again, and we welcome new students and teachers to follow their example.

Sincerely,

Director,
Jiangsu Education Services for International Exchange
