CODING & ROBOTICS CAMP

Learn to code or grow your coding skills this summer! Campers will explore the basic concepts of computer programming with easy-to-use, drag-and-drop programming tools and learn to manipulate robots Dot and Dash. Students will explore the basic concepts of computer programming with easy-to-use, drag-and-drop programming tools. Plus, learn how to build their own video games, animations, websites and more...

June 18th & 19th – 2 Day Camp K-12
9 am – 2pm @Pattillo Middle

Maker Camp: From Movies to Stuff

Maker Camp is designed to get students making more and to use their imaginations to solve everyday problems. Students will create projects while exploring electronics and virtual reality.

But Wait.... There's more... Do you love to watch movies? Have you ever thought about making one of your own? Now is your chance to work with others like you. Using the iPad, a simple app called DoInk, and iMovie, participants will learn how you can be transported to any location or situation. Campers will learn the basics of green screen technology, script-writing, and editing. Products will be showcased at the end of camp.

June 27th & 28th – 2 Day Camp K-12
