

Mission Statement

Our adult classes are funded by Kings Canyon Unified School District. The classes have been offered since spring of 2000. Our program was created as a need to reach out to our growing Latino community. The classes provide free instruction to our parents or other members of our community who pledge to provide personal tutoring to their children. Our mission is not only to teach English but also to provide our parents with many resources from the community so that they feel welcome to a new country. In addition, we want to empower them with different programs like the Latino Family literacy Project, women's support groups, parenting classes, computer classes and citizenship classes. We provide presenters according to the parents needs in the community. We believe parents are the first educators and it is really important for parents to be a role model for their children and instill in them the value of education.
