To Whom It May Concern,

In accordance with the 1989 United States Environment Protection Agency Rule: Asbestos Containing Material in Schools, 40 CFR Part 763, also known as AHERA (Asbestos Hazard Emergency Response Act), an Asbestos Management Plan has been developed for each Collierville School. This plan details the locations of asbestos containing materials (if applicable), any activities regarding asbestos repair or removal (if applicable), and the performance of inspections.

Under AHERA Paragraph 763.93 the Management Plan is to be made available to all government employees, workers, building occupants, and their legal guardians. The plan is located in the school's library. Arrangements to view the plan should be made through the school's principal. The school is to make the plan available within five (5) working days after receiving such request. **The majority of constructions, renovations, and repairs conducted after 1990 were done so with "asbestos-free" materials. These schools will have an "Asbestos-Free Management Plan".**

Inspections and renovations are conducted throughout the year. During the last school year only inspections were performed.

Further information may be obtained by contacting Collierville Schools Operations Department at (901) 286-6701.

It is required that the information contained in this letter be made part of PTA meeting minutes.

Thank you,

Thomas Dougherty, Operations Specialist
