

# Everest Remote Installation

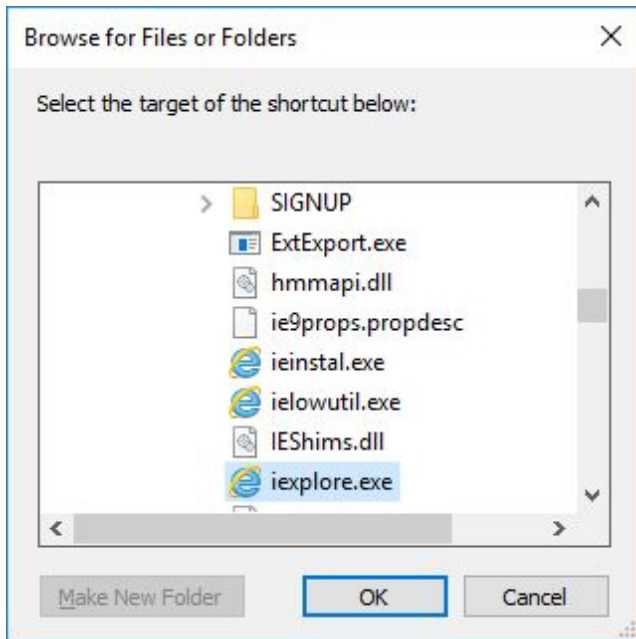

How to install the Everest Remote Software. These steps will guide you through the process of installing the Everest Remote Software.

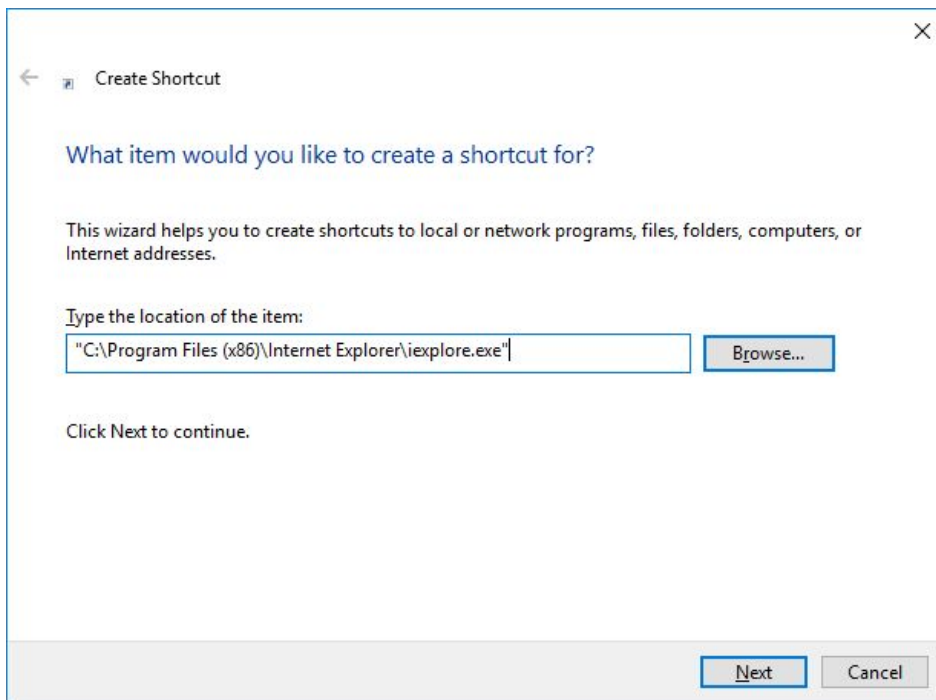

**Right Click** anywhere on the blank Desktop. **Click on *New*** and then on ***Shortcut***.

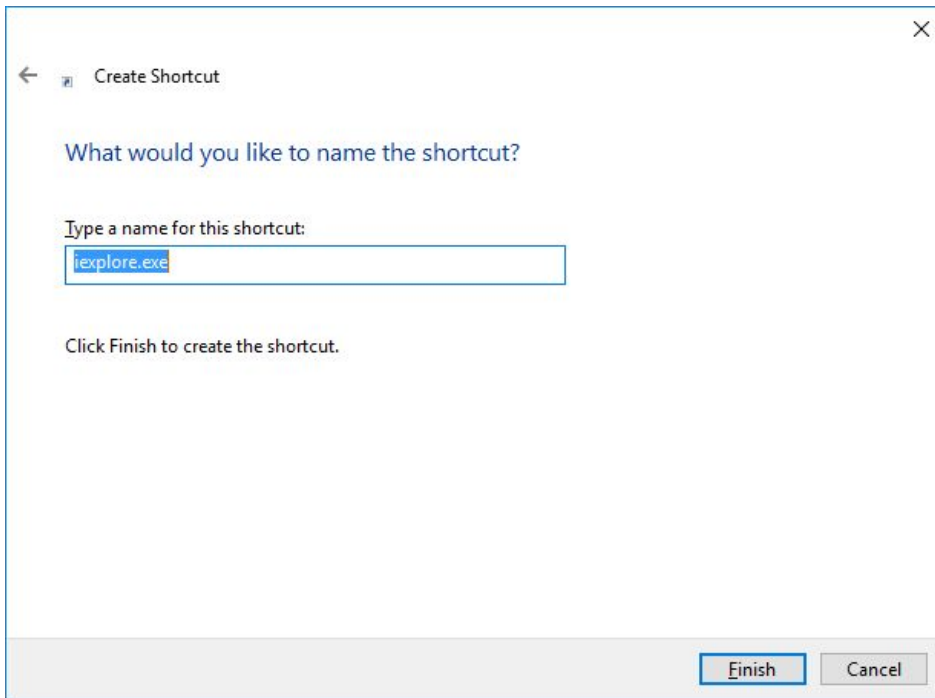

You should see a window pop up. **Click on *Browse***.

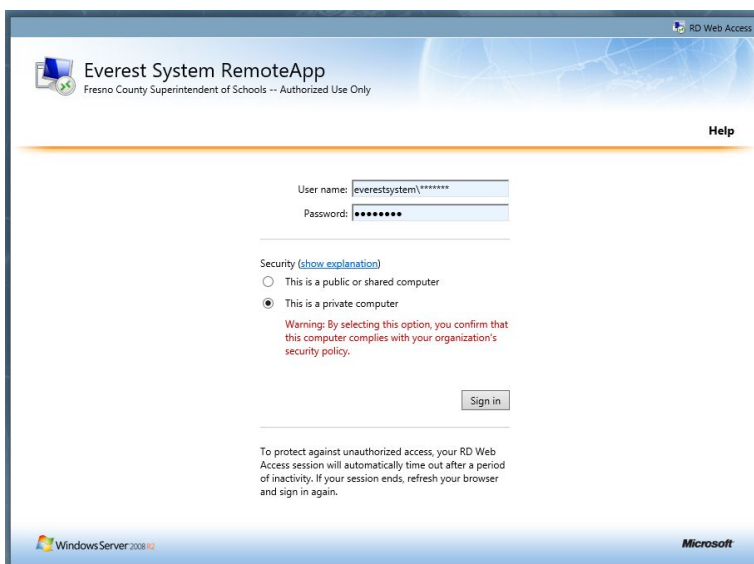

When the smaller box comes up, navigate to the following folder:  
**“C:\Program Files (x86)\Internet Explorer\iexplore.exe”**  
Click on the *iexplore.exe* file and Click **OK**.

Now **click** on the text that was populated in the **box**. **Click** all the way to the far **right** and type a space and then the following:  
<https://remoteapp.everestsystem.org/RDWeb/Pages/en-US/login.aspx>  
Click **Next**.

Give it the **Name Everest** and **Click Finish**.

**Double Click** the **Shortcut** you created and type in your **username** and **password**.

You have successfully completed the installation of Everest Remote. If you still need assistance please contact Technology Services for help.
