

The Floresville ISD Education Foundation is pleased to announce the recipients of the 2015 Innovative Teaching Grants. In September, the Foundation announced that it would fund grants submitted by FISD teachers and administrators for a variety of innovative programs and projects to support higher levels of student learning. This year's funded grants will enhance student academic performance and support the objectives, goals, and initiative of the Campus Action Plan.

The Foundation received thirty-five applications from teachers and administrators at all school levels - elementary, middle and high school, involving more than 70 teachers. A grant committee had the privilege to review all the applications and selected eight grants to fund at this time. The committee had a difficult time selecting grant winners and wished all applications had the necessary funding.

On December 4, the Foundation awarded \$5140.00 in grants to the following teachers and projects at each campus.

OSMO Interactive Learning
Jennifer George
Floresville South Elementary School

Kindles in the Dyslexia Classroom
Beverly La France
Floresville North Elementary School

Robotics Club Grant
