

## Student Wellness Policy Assessment

2017-2018

The Smith County Wellness Policy annual review was conducted on October 11, 2017. Each school has a Healthy School Team that reviews the School Health Index and meets all requirements. The Smith County Health Council serves as the School Health Advisory Council. The School Health Advisory Council receives monthly updates from the Coordinated School Health Program Coordinator. Any recommendations from the council are shared with the Director of Schools. The Review Committee identified areas of compliance that need monitoring. The group has developed and distributed the compliance log. The current wellness policy is directly related to the TSBA model policy.
