INFORMATION SHEET FOR PARENTS REGARDING AB2260, THE HEALTHY SCHOOLS ACT OF 2000

In September 2000, Governor Davis signed into law the Healthy Schools Act of 2000 (Assembly Bill 2260). This law requires schools to notify parents, guardians and school employees about pesticides used in their schools, and requires the Department of Pesticide Regulation to promote the voluntary adoption of integrated pest management (IPM) practices in California schools. Most provisions of the law took effect January 1, 2001. Each school district is to implement the following requirements of the law:

- Notification of all pesticide products the school district expects to use on school grounds must be sent annually to parents or guardians of students. These products include over-the-counter pesticides available at retail outlets, but do not include certain products exempted under the law. The notifications must list the active ingredients in each pesticide product and the Internet address for the Department of Pesticide Regulation (DPR) to access additional information. Visit DPR's Web site at <http://www.cdpr.ca.gov> and click on School IPM Program.
- Each school will establish a list of parents or guardians who want to be notified before individual pesticide applications are made.
- Each school district will ensure that warning notices are posted in areas where pesticides will be applied. These signs will be posted 24 hours in advance and 72 hours after application of pesticides, and will contain information as specified in the law.
- Each school will maintain records of all pesticide use at the school for four years and the records will be available to the public upon request.

Healthy Schools Act of 2000

(a) The school designee shall annually provide to all staff and parents or guardians of pupils enrolled at a schoolsite a written notification of the name of all pesticide products expected to be applied at the schoolsite during the upcoming year. The notification shall identify the active ingredient or ingredients in each pesticide product. The notice shall also contain the Internet address used to access information on pesticides and pesticide use reduction developed by the Department of Pesticide Regulation pursuant to Section 13184 of the Food and Agricultural Code and may contain other information deemed necessary by the school designee. No other written notification of pesticide applications shall be required by this act except as follows:

(1) In the written notification provided pursuant to this subdivision, the school designee shall provide the opportunity for recipients to register with the schoolsite if they wish to receive notification of individual pesticide applications at the schoolsite. Persons who register for notification shall be notified of individual pesticide applications at least 72 hours prior to the application. The notice shall include the product name, the active ingredient or ingredients in the product, and the intended date of application.

(2) If a pesticide product not included in the annual notification is subsequently intended for use at the schoolsite, the school designee shall, consistent with this subdivision and at least 72 hours prior to application, provide written notification of its intended use.

(b) The school designee shall make every effort to meet the requirements of this section in the least costly manner. Annual notification by a school district to parents and guardians shall be provided pursuant to Section 48980.3. Any other notification shall, to the extent feasible and consistent with the act adding this article, be included as part of any other written communication provided to individual parents or guardians. Nothing in this section shall require the school designee to issue the notice through first-class mail, unless he or she determines that no other method is feasible.

(c) Pest control measures taken during an emergency condition as defined in Section 17609 shall not be subject to the requirements of paragraphs (1) and (2) of subdivision (a). However, the school designee or property owner shall make every effort to provide the required notification for an application of a pesticide under emergency conditions.

(d) The school designee shall post each area of the schoolsite where pesticides will be applied with a warning sign. The warning sign shall prominently display the term "Warning/Pesticide Treated Area" and shall include the product name, manufacturer's name, the United States Environmental Protection Agency's product registration number, intended date and areas of application, and reason for the pesticide application. The warning sign shall be visible to all persons entering the treated area and shall be posted 24 hours prior to the application and remain posted until 72 hours after the application. In case of a pest control emergency, the warning sign shall be posted immediately upon application and shall remain posted until 72 hours after the application.

(e) Subdivisions (a) and (d) shall not apply to schools operated by the Division of Juvenile Justice. The school administrator of a school operated by the Division of Juvenile Justice shall notify the chief medical officer of that facility at least 72 hours prior to application of pesticides. The chief medical officer shall take any steps necessary to protect the health of pupils in that facility.

(f) This section and Section 17611 shall not apply to activities undertaken at a school by participants in the state program of agricultural vocational education, pursuant to Article 7 (commencing with Section 52450) of Chapter 9 of Part 28, if the activities are necessary to meet the curriculum requirements prescribed in Section 52454. Nothing in this subdivision relieves schools participating in the state program of agricultural vocational education of any duties pursuant to this section for activities that are not directly related to the curriculum requirements of Section 52454.

(g) Sections 17610 to 17612, inclusive, shall not apply to family day care homes or property owners of day care homes, as defined in Section 1596.78 of the Health and Safety Code, or their agents who personally apply any pesticides.

(h) If pesticide is applied by a property owner or his or her agent, or by a pest control operator, failure to provide notice pursuant to subdivision (b) of Section 17610 or subdivision (d) of Section 13186 of the Food and Agricultural Code shall relieve a privately operated child day care facility from the requirements of this section.

(Amended by Stats. 2006, Ch. 865, Sec. 3.)

Administrative Regulation

Integrated Pest Management

AR 3514.2

Business and Noninstructional Operations

Education Code 17610 encourages the use of effective, least toxic pest management practices for the control and management of pests at school sites. The California Department of Pesticide Regulation (DPR) has established an integrated pest management (IPM) program for use by school districts, including a model program guidebook and an Internet web site containing a comprehensive directory of resources describing and promoting the use of integrated pest management practices. Information about these programs can be found on DPR's web site.

Note: The following optional regulation should be revised to reflect district practice.

Definition

Integrated Pest Management (IPM) means a strategy that focuses on long-term prevention or suppression of pest problems through a combination of techniques such as monitoring for pest presence and establishing treatment threshold levels, using nonchemical practices to make the habitat less conducive to pest development, improving sanitation, and employing mechanical and physical controls. Pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property, and the environment are used only after careful monitoring indicates they are needed according to pre-established guidelines and treatment thresholds. (Food and Agricultural Code 13181)

Procedures

Note: The following section reflects IPM measures recommended by DPR and the U.S. Environmental Protection Agency (EPA) and should be modified to reflect district practice.

The Superintendent or designee shall designate a staff person to develop, implement, and coordinate an IPM program that incorporates effective, least toxic pest management practices. The district's program shall include the following elements:

1. Carefully monitoring and identifying the pest population levels and identifying practices that could affect pest populations. Strategies for managing the pest shall be influenced by the pest species and whether that species poses a threat to people, property, or the environment.
2. Setting action threshold levels to determine when pest populations or vegetation at a specific location might cause unacceptable health or economic hazard that would indicate corrective action should be taken.

3. Modifying or eliminating pest habitats to deter pest populations and minimize pest infestations.
4. Considering a full range of possible alternative treatments. Such alternative treatments may include taking no action or controlling the pest by physical, horticultural, or biological methods. Cost or staffing considerations alone will not be adequate justification for use of chemical control agents.
5. Selecting nonchemical pest management methods over chemical methods whenever such methods are effective in providing the desired control or, when it is determined that chemical methods must be used, giving preference to those chemicals that pose the least hazard to people and the environment.
6. Ensuring that persons applying pesticides follow label precautions and are trained in the principles and practices of IPM.

(cf. 4231 - Staff Development)

7. Limiting pesticide purchases to amounts needed for the year. Pesticides shall be stored at a secure location that is not accessible to students and unauthorized staff. They shall be stored and disposed of in accordance with state regulations and label directions registered with the U.S. Environmental Protection Agency (EPA) as well as any disposal requirements indicated on the product label.

(cf. 3514.1 - Hazardous Substances)

Prohibited Pesticides

Note: AB 405 (Ch. 566, Statutes of 2005) added Education Code 17610.1 to prohibit districts from using certain pesticides that have been granted only a conditional or interim registration or an experimental use permit by the DPR or the EPA, as specified below. Education Code 17610.1 also prohibits vendors or manufacturers of such pesticides from selling or giving the pesticides to the district.

***Note: A list of pesticides prohibited for use on school sites by Education Code 17610.1 can be found on the DPR's web site. ***

The IPM Coordinator shall not use a pesticide on a school site if that pesticide has been granted a conditional or interim registration or an experimental use permit by the California Department of Pesticide Regulation (DPR) or if the pesticide is subject to an experimental registration issued by the EPA and either of the following conditions exists: (Education Code 17610.1)

1. The pesticide contains a new active ingredient.
2. The pesticide is for new use.

In addition, the IPM Coordinator shall not use a pesticide on a school site if DPR cancels or suspends registration or requires that the pesticide be phased out from use. (Education Code 17610.1)

Notifications

Note: Education Code 17612 requires the district to annually notify staff and parents/guardians in writing regarding the pesticides expected to be applied at a school site in the upcoming year. Pursuant to Education Code 48980.3, the district may satisfy this requirement by including the notification in its annual parental notification.

The IPM Coordinator shall annually notify staff and parents/guardians of students enrolled at a school site, in writing, regarding pesticide products expected to be applied at the school facility in the upcoming year. The notification shall include at least the following: (Education Code 17612)

1. The Internet address (<http://www.schoolipm.info>) used to access information on pesticides and pesticide use reduction developed by the DPR pursuant to Food and Agricultural Code 13184.
2. The name of each pesticide product expected to be applied in the upcoming year and the active ingredient(s) in it.

Note: In addition to the annual notification, Education Code 17612 requires the district to provide an opportunity for staff and parents/guardians of students enrolled at a school site to register to be notified of individual pesticide application at the school site at least 72 hours prior to the application.

3. An opportunity for interested persons to register to receive notification of individual pesticide application at the school site. The IPM Coordinator shall notify such registered persons of individual pesticide applications at least 72 hours prior to the application. The notice shall include the product name, the active ingredient(s) in the product, and the intended date of application.
4. Other information deemed necessary by the Superintendent or IPM Coordinator.

(cf. 1312.4 - Williams Uniform Complaint Procedures)
(cf. 3517 - Facilities Inspection)
(cf. 4112.9/4212.9/4312.9 - Employee Notifications)
(cf. 5145.6 - Parental Notifications)

If a pesticide product not included in the annual notification is subsequently intended for use at a school site, the IPM Coordinator shall provide written notification of its intended use to staff and parents/guardians of students enrolled at the school, at least 72 hours prior to the application. (Education Code 17612)

Note: Education Code 17612 exempts emergency conditions from strict compliance with the notification requirements. Good faith efforts to comply with the notification requirements are deemed sufficient.

Whenever the IPM Coordinator deems that the immediate use of a pesticide is necessary to protect the health and safety of students, staff, or other persons at the school site, he/she shall make every effort to provide the required notifications prior to the application of the pesticide. (Education Code 17612)

(cf. 3514 - Environmental Safety)

Posting of Warning Signs

Note: A sample warning sign can be found on the DPR web site.

The IPM Coordinator shall post a warning sign at each area of the school site where pesticides will be applied that shall be visible to all persons entering the treated area. The sign shall be posted at least 24 hours prior to the application and until 72 hours after the application. The warning sign shall display the following information: (Education Code 17612)

1. The term "Warning/Pesticide Treated Area"
2. The product name, manufacturer's name, and the EPA's product registration number
3. Intended areas and dates of application
4. Reason for the pesticide application

When advance posting is not possible due to an emergency condition requiring immediate use of a pesticide, the warning sign shall be posted immediately upon application and shall remain posted until 72 hours after the application. (Education Code 17609, 17612)

Records

Each school site shall maintain records of all pesticide use at the school for four years, and shall make the information available to the public, upon request, in accordance with the California Public Records Act. Such records may be maintained by retaining a copy of the warning sign posted for each pesticide application with a recording on that copy of the amount of the pesticide used. (Education Code 17611)

(cf. 1340 - Access to District Records)

SAN LORENZO VALLEY UNIFIED SCHOOL DISTRICT

INTEGRATED PEST MANAGEMENT (IPM) PROGRAM

The use of pesticides and chemicals has become increasingly common in our schools when dealing with problems such as pests and weeds. Many of the pesticides currently in use in our society pose risks to human health and the environment, with special risks to children. Some pesticides can cause adverse health effects in humans. Therefore, it is important that San Lorenzo Valley Unified School District (SLVUSD) have a policy and procedure for managing pests on school sites in a manner that is safe for all humans.

It is the goal of SLVUSD to provide the safest and lowest risk approach to controlling pest problems while protecting people, the environment, and property.

SCOPE

This IPM Program applies to all building, facilities, landscapes, and grounds owned and operated exclusively by San Lorenzo Valley Unified School District.

DEFINITIONS

- A) Integrated Pest Management (IPM): This is a pest management strategy that focuses on long-term prevention or suppression of pests through a combination of techniques. Such techniques may include, but are not limited to:
- Monitoring for pest presence and establishing treatment threshold levels.
 - Using non-chemical practices to make the habitat less conducive to pest development.
 - Improving sanitation.
 - Employing mechanical and physical controls.
- B) IPM Coordinator: The Director of Maintenance shall serve as the IPM Coordinator and will be responsible for the overall IPM program implementation and oversight. As IPM Coordinator, the Director of Maintenance has the responsibility for all facets of pest management, including coordination of product selection, recordkeeping, training, and program review.
- C) Antimicrobial: The pesticides defined by the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C. Sec. 136 (mm)).
- D) Crack and Crevice Treatment: The application of small quantities of a pesticide consistent with labeling instructions in a building into openings such as those commonly found at expansion joints, between levels of construction, and between equipment and floors.

- E) Emergency Condition: Any circumstances wherein the school designee deems that the immediate use of pesticide is necessary to protect the health and safety of students and staff.
- F) School Site: Any facility used for public day care, kindergarten, elementary, or secondary school purposes. The term includes the buildings or structures, playgrounds, athletic fields, school vehicles, or any other area of school property visited or used by students.

PEST MANAGEMENT COMMITTEE

The Pest Management Committee shall be responsible for the implementation of this policy and shall help in determining which pesticides/herbicides shall be on the Approved Pesticide List. The committee shall also investigate lowest risk methods of pest control and explore their feasibility for implementation.

The Committee shall be made up of three (3) district employees:

1. Chief Business Officer
2. Director of Maintenance
3. A Maintenance employee appointed by the Director of Maintenance.

SAFE PRACTICES

The following safe practices will be implemented as appropriate. The IPM Coordinator shall determine implementation.

- Chemical products shall not be used directly around children.
- Students shall be kept off of freshly sprayed lawns and fields.
- No chemicals or other pest managements products should be brought from home for use in the classroom.
- Everyone is responsible for good housekeeping. Good housekeeping is essential for effective pest management.

APPROVED PESTICIDE/HERBICIDE LIST

The IPM Coordinator shall maintain a list of all pesticides/herbicides that have been approved for use in the schools, along with any restrictions for their use. This list shall be referred to as the "Approved Pesticide List." The Approved List shall include, but not be limited to insecticide or rodenticide baits and traps; herbicides; borates, silicates, and diatomaceous earth; soap-based products; products on the Federal Insecticide Fungicide and Rodenticide Act (FIFRA) 25 (b).

Exemptions: School staff may request permission from the Committee to use pesticides/herbicides that are banned under the provision of this policy or are not on the Approved Pesticide List. Exemptions to the policy may be given for limited uses, for a

limited time, based on staff documenting (1) nature of the pest problem; (2) an explanation why the banned product should be used.

NOTIFICATION TO STAFF

The Chief Business Office or designee shall inform all Department Heads/Site Administrators of this policy and inform them of their responsibilities under the policy. Such responsibilities will include communicating to all employees at least once a year, orally and through staff handbooks or memos, that no pesticides/herbicides may be used that are not on the Approved List.

IMPLEMENTATION

Purchasing: SLVUSD shall only purchase pesticides/herbicide products that are on the Approved Pesticide List

STORAGE: All pesticides/herbicides shall be stored in a manner consistent with manufacturer recommendations and in a location away from children, behind lock doors and where children are not allowed.

PESTICIDE/HERBICIDE APPLICATION: No pesticide/herbicide shall be used at a school site unless that pesticide is on the Approved Pesticide List. Only district designated staff may spray or apply pesticides/herbicides.

OUTSIDE VENDORS: If an outside vendor is hired to apply pesticides/herbicides at any school site, the outside vendor shall be given copies of the Approved List and shall make any pesticide/herbicide application in accordance with the Approved List and this policy. The IPM Coordinator shall be responsible for ensuring the policy is given to the outside firm, and both this policy and the Approved List are made a part of the service contract with the firm. Outside applicators shall be knowledgeable in the principles of IPM and willing to work within this policy and the Approved List.

ANNUAL NOTIFICATION TO PARENTS/GUARDIANS

The CBO or designee shall annually provide written notification of the pesticide application process to all sites. In turn, the sites will disseminate this information to all parents/guardians of students enrolled at their school site. Such notification will be in the form of an annual letter to the parents/guardians of all students. The notification letter will be sent out at the beginning of each school year and shall include (1) name(s) of all pesticide/herbicide products expected to be applied during the upcoming year; (2) the active ingredient in each pesticide/herbicide product; (3) the internet address used to access information on pesticide/herbicide use; and (4) the opportunity to register with SLVUSD to receive information regarding individual pesticide/herbicide applications.

NOTIFICATION OF SENSITIVE INDIVIDUALS

The school site will maintain a registry of students, staff, or others requesting special consideration in the event of the use of pesticides. Such notification shall include that a written notice will be mailed to families or delivered to students at least 72 hours prior to any application and that a sign shall be posted around the area where pesticides will be applied at least 72 hours before and after any pesticide application. The sign shall include the product name, manufacturer name, active ingredient of the pesticide, the target pest, the date of pesticide use, the signal word indicating the toxicity category of the pesticide, EPA registration number and a contact for further information.

POSTING

The school site must post a warning sign at each area of the school site (s) where pesticides will be applied. The warning sign shall prominently display the following:

- The term "WARNING/PESTICIDE TREATED AREA"
- The product name
- The manufacturer's name
- The U.S. Environmental Protection Agency's product registration number
- Intended date of use and areas of application
- Reason for the pesticide application

The warning sign shall be visible to all persons entering the treated area and shall be posted 72 hours prior to the application and remain posted until 72 hours after the application.

RECORDKEEPING OF PESTICIDE/HERBICIDE APPLICATIONS

The IPM Coordinator shall keep records of each pesticide/herbicide application. Such records shall be considered Public Records and available for inspection by the public. Each application record shall include the following information:

- The type and quantity of the pesticide/herbicide used
- The site of the pesticide/herbicide application
- The date the pesticide/herbicide was used
- The name of the pesticide/herbicide applicator

EMERGENCY APPLICATION

Pest control measures taken during an emergency condition as defined above shall not be subject to the notification requirements above. However, the IPM Coordinator shall make every effort to provide the required notification for an application of a pesticide under emergency conditions.

In case of a pest control emergency, the warning sign shall be posted immediately upon application and shall remain posted until 72 hours after the application.

EXCEPTIONS

The notification, posting, and recordkeeping requirements contained herein shall not apply to a pesticide product deployed as the following:

- A self-contained bait or trap
- Gel or paste deployed as a crack and crevice treatment
- Any pesticide exempted from regulation by the United States Environmental Protection Agency pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (7 U.S.C., Section 25 (b))
- Antimicrobial pesticides, including sanitizers and disinfectants

SAN LORENZO VALLEY UNIFIED SCHOOL DISTRICT
DISTRICT PEST CONTROL MANAGEMENT
PESTICIDE APPLICATION PROCEDURES

District Staff Procedure:

1. All pesticide applications will be arranged by the Maintenance Department and approved by the Director of Maintenance.
2. Once approved, the Director of Maintenance will prepare the Warning Sign **“NOTICE OF PESTICIDE TREATED AREA”** (*Sample A*). The signage will require the following information:
 - a. Type of Notice (usually 72 Hours – Parent Notification Required)
 - b. Product and Manufacturer Name
 - c. Active Ingredient and USEPA Reg. No.
 - d. Target Pest/s
 - e. Date of Application and Date the Sign is to be removed.
 - f. Signal Word (usually CAUTION)
3. The Maintenance Director will email a copy of the completed warning signage, along with instructions for posting, to the site principal and administrative assistant four days (96 hrs) prior to application.
4. The Maintenance Director will prepare, maintain and control the School Sites Pesticide Use Reporting Form (*Sample B*). This form must be completed each time a pesticide application is performed anywhere in the District. Reporting forms should be kept for four years.

Site Procedure

1. All sites must include the Use of Pesticides Notification Letter to Parents (*Sample C*) in their enrollment packets at the start of school each year. This letter is prepared by the District Chief Business Officer and informs parents of their right to be notified prior to each pesticide application.
2. Those parents who respond to the letter with a request for advance notification for each pesticide application should be kept on a list and notified by email prior to each pesticide application.
3. When a site receives email notice of intent to apply pesticides from the Director of Maintenance, the site administrative assistant will print the prepared signage attachment warning of pesticide application (*Sample A*). The site custodian or principal’s designee will post **sign/s** near and around the intended area of application. Signs must be posted at least 3 days (72 hours) prior to application and left up until 72 hours after application.
4. The Administrative Assistant shall send email notification to those parents who have requested they be contacted prior to each pesticide application (72 hours prior to application). Emailing a copy of the Maintenance Director’s Warning Sign should be sufficient.
5. The Administrative Assistant shall keep a record (file) of pesticide applications that occur at their site. This is accomplished by listing the applicable information on the School Site Pesticide Use Reporting form *Sample B*. This information must be retained at the site for four (4) years.

WARNING

PESTICIDE TREATED AREA

It was deemed necessary to apply a pesticide in order to gain control of pests that are invading this area.
