# Pharmacy

Pharmaceuticals are everywhere! If you are interested in ANY aspect of healthcare this is a great course to prepare you for interaction in the medical world. Categories of medications, what and how they treat are all important aspects to the medical field. Pharmacy encompasses every aspect of medication from research and development to packaging the medication for the patient.

Anyone interested in pharmacy should have excellent written and verbal communication skills, enjoy science and math as well as a passion for understanding how the human body works with medications.
