

**LAWNDALE ELEMENTARY SCHOOL DISTRICT**  
**On behalf of**  
**SOUTHWEST SELPA**

**PUPIL TRANSPORTATION SERVICES**  
**PROJECT BID# 0001-18-19**  
**BID ADDENDUM #1**

## BID ADDENDUM #1

**Project:** PUPIL TRANSPORTATION SERVICES, Bid #0001-18-19

**Owner:** Lawndale Elementary School District on behalf of Southwest SELPA  
4161 W. 147<sup>th</sup> St.  
Lawndale, CA 90260

**Date Issued:** January 31, 2018

The clarifications, modifications, changes, additions, and/or deletions contained herein shall be incorporated within the bid documents. Such information shall take precedence over that previously published.

### **GENERAL:**

#### **Item A: Addendum acknowledgement**

Acknowledge receipt of this addendum on the space provided in the bid form.

#### **Item B: Revisions to bid document**

- 1) Delete Requirement "Professional Liability" Page 44, section IX.a

#### **Item C: Answers to questions**

- Will the bids be publicly opened and read on February 8 at 12:00 pm?  
**No.**
- Page 4, are all 12-member districts committed to participating in the SELPA transportation? Please confirm which members are participating.  
**These are regionalized programs so at any given time the number of students enrolled is different. Right now we have 314 students from all 12 districts. There are 12 school districts in our SELPA.**
- It appears the current transportation services are provided through LACOE. Which school transportation providers are currently providing these services under LACOE administration?  
**Durham.**
- Page 12, schedule B asks for the cost of Bus Monitors as an hourly rate. Is the bidder able to expect the hourly Monitor charge is subject to the same minimum 5 hour daily rate as the bus and driver?  
**No. Only costs associated in Section A have the five (5) hour minimum. Personnel rates are not.**
- Page 12, Schedule, how is a bidder to estimate the number of routes when the only information provided in the bid specifications is a list of class locations and a list of 12 member districts? The SELPA will need to provide more information about the scope of work if it wishes to receive bids. Bidders need to know the number of students to be transported, how many are ambulatory or wheelchair, how many in car seats, their home addresses, the school of attendance and the school hours, as a minimum. We understand this is a new service for the SELPA but please provide this information for the students that are currently being transported for the

## **BID ADDENDUM #1**

member districts since that will be a good indication of the scope of service to be provided under the SELPA arrangement. Without this information, a bidder cannot estimate how many or what type of buses are required, how big a facility is required, how much staff is required, what amount of performance bond is needed, etc.

**See attachment of school location addresses and number of students from each district.**

- In order to know if there is enough time to buy any new buses needed for this service, when does the SELPA expect to award a resulting contract?  
**Award of contract will be in April. Services will begin in August.**
- Does the District utilize charter coaches for field trips & other extracurricular activities or are most trips accommodated with school buses?  
**Most trips are accommodated with school buses.**
- Is there an opportunity to bid on just the field trip transportation or are you looking for one vendor to accommodate all transportation.  
**We are looking for one vendor to accommodate all transportation needs.**
- In order to ensure there is enough time to create bus routes, by what date will the student transportation requests be provided to the successful Contractor so that bus routes can be developed and tested?  
**They will be provided in April after the contract has been awarded and signed.**
- Page 40, section II, "performance", since the statement "The District may cancel this contract at any time with thirty (30)-day written notice to the Contractor" is under the heading of "Performance" can we assume this would only apply in response to a contract default due to poor performance?  
**The time of the biannual evaluations, or anytime that the contractor's performance in any of the terms of contract mentioned in this paragraph could result in a 30 day notice of cancellation.**
- Page 41, section 9, please define "missed trip". For example, if a student is not ready at the pickup time or does not come out after two minutes, is that a missed trip? Given traffic in the Los Angeles area, a 15 minute response time is not realistic. Please consider changing that to 30 minutes.  
**In this case a "missed trip" refers to the failure of a driver/vehicle to show up for a scheduled stop. The contractor must be prepared to account for traffic in scheduling, and keeping in mind that we are transporting with students who need to be in class by a specific time, the 15-minute time limit is appropriate.**
- Page 44, section IX.a, transportation companies do not carry professional liability insurance. Please delete this requirement.  
**See Item B on this Addendum.**
- Page 45, states, "DISTRICT may, at its discretion, require additional coverage or additional limits based on the nature of the services provided". Please confirm the SELPA will negotiate a price increase with the Contractor to compensate for any additional coverage required by the district beyond that listed in the bid specifications.  
**Yes, SELPA will negotiate a price Increase with the contractor to compensate for any additional coverage beyond the listed in the bid specifications.**

## **BID ADDENDUM #1**

- Page 46, section XI, states the successful bidder is to "invoice each trip individually". The standard practice is to bill monthly after the services are provided. An invoice would list each bus route, the number of school days it ran, the base daily rate and a description of any excess hours charge d. If this is not acceptable, please detail what the district is looking for.  
**Yes, a standard monthly billing as described above is sufficient.**
- Are you able to provide the route locations and times of pick up for home to school service?  
**The routes will be published.**
- How many students are using the home to school service?  
**Approximately 165**
- Can you share the contract and a few months of invoices of the current school bus transportation provider?  
**Not at this time as it wouldn't be applicable.**
- Are any of the riders sharing rides in the same vehicle?  
**Yes.**
