Your test for chapters 7-9, 16 will be 50 multiple-choice question and 5 free-response questions. Each chapter will have 10-12 questions and then about 10 questions will come from previous learning, the Budget Challenge quizzes, and the What's Next packets on Savings Accounts, Credit Cards, and Taxes. There will be two types of questions on the test. One type will test your standards-based content knowledge. The second will be practical problems that will test your ability to apply what you have learned. This review sheet will help you prepare for both but it is not all-inclusive of the test questions. **This review sheet will not be graded but it will help you be successful on the test.** If you need the textbook pages, I will post them on my website. The answer key to this review will be posted on Wednesday night so you can check your answers.

**CHAPTER 7: BUSINESS OPERATIONS**

1. The advantages of a ____________________ include ease of formation, total ownership of profit and total control of business decisions.

2. A business organization that can conduct business in its own name and can own property as if it were an individual is a ____________________ .
