

Dear GMS Parents and GMS Students for the 2015-2016 Year,

This summer we have a great opportunity to help prevent the infamous summer slide! “TenMarks” (an amazon company) is offering a summer math program free to our students. Many of our students have already had the opportunity to work with TenMarks throughout this past school year and are familiar with how it works.

We are issuing a challenge to our Goshen Middle School students! We will be having a competition for the greatest number of problems completed over the summer.

**How do you compete? Good question!**

- \*Use the parent letter to set up the account.
- \*Sign up before the end of May to receive an email from TenMarks.
- \*Follow the directions on the attached TenMarks parent letter to be successful with setting the program up at home.
- \*Take a diagnostic test which will assign you the appropriate lessons for YOU! This means the problems will help you with what you need to improve on and also challenge you.
- \*Work on the TenMarks lessons throughout the summer.
- \*At the end of summer, print off the summary sheet that shows what you have completed.
- \*Turn it in to your math teacher when school starts.

**Opportunities for prizes:**

- \*Top 10 students from each team will receive a pizza party.
- \*For every 5 assignments completed, the student’s name will be entered in a drawing for other prizes.
- \*Bring in the summary sheet to your math teacher. This will be used for the drawing.

We look forward to see how well our students perform!

Goshen Middle School Math Department
