

SuccessMaker in Internet Explorer

- Open internet explorer
- Type <https://archsa1073.smhost.net/>
- a screen will pop up that has “Enter Here”
- Click it
- Username for every student is their first and last name as one word
- Password for all students is the same as the username
- Once they have signed in, the students should click either mathematics or reading
 - If a box pops up that asks whether to ‘Allow’ Java to open, click ALLOW
- All students should select LOG OUT before exiting. NO ONE should click the red x.

SuccessMaker Troubleshooting for Internet Explorer

Java needs to be updated for all computers in order for SuccessMaker to work properly. This program does NOT self-update and generally needs frequent updates as they release new versions weekly. IF your students cannot get into SuccessMaker, they should type the following web address into their web address bar:

<https://java.com/en/download/index.jsp>

Then they should click Free Java Download. A new page will open with a large red square that says “Agree and Continue” They should click this.

- Click ‘run’
- It may ask “Allow OracleAmerica to make changes?” Click “Allow”
- Java will pop up. They should select ‘install’
- It will load and then a screen will pop up with Java by Ask- MAKE SURE STUDENT GET RID OF THE CHECK BOXES that would set “ask” as the default browser and home page”
- Then click next
- Click Close
- A new screen will pop up Click “Verify Java Version”
- Then click run when the Java Detection box pops up

Have students exit out of all internet and then reopen Internet Explorer.

SuccessMaker in Google Chrome

- Open Google Chrome
- Type <https://archsa1073.smhost.net/>
- a screen will pop up that has “Enter Here”
- Click it
- Username for every student is their first and last name as one word
- Password for all students is the same as the username
- Once they have signed in, the students should click either mathematics or reading
- All students should select LOG OUT before exiting. NO ONE should click the red x.
