

Change your Windows password

You may change your password at any time without the computer prompting you to. You can help keep your computer more secure by changing your Windows password regularly and by using a strong password, keep in mind it must be a minimum of 8 characters. We recommend creating a password that contains uppercase letters, lowercase letters, numbers and special characters.

1. Press **Ctrl+Alt+Delete**, and then click **Change a password**.

2. Type your old password, type your new password, type your new password again to confirm it, and then press Enter.
