Our Vision

Each ZCS graduate is prepared to create a successful and productive future within the world community.

Our Mission

ZCS provides a customized 21st century learning experience that ensures maximum student growth leading to productive citizenship in the world community.

In Zionsville Community Schools we celebrate educators who...

- Focus on student learning by consistently asking ...
 - “What is it we expect them to learn?”
 - “How will we know when they have learned it?”
 - “How will we respond when they don’t learn?”
 - “How will we respond when they already know it?”
- Contribute as a member of a learning community
- Take risks and try new approaches
- Employ interdisciplinary, project-based learning
- Facilitate a classroom environment with the student at the center
- Have a collaborative spirit as shown through providing and accepting ideas/work/activities from and for colleagues (and from students)
- Invest in continuous professional growth and learning
- Redefine assessments, allowing for flexibility based on product/work/activity, then utilize these formative assessments to calibrate instruction
- Reinvent instructional practices and student activities as technologies allow for improvement
- Tap student interest as a vehicle to enhance learning of course content
- Innovate, experiment, and explore
- Connect the classroom with the community (local, state, national, international) and promote real-world application with course content
