St. Bernard's School
in cooperation with
Mad Science of Pittsburgh
Presents:
The "Minerals, Machines, & Movies"
After School Program

Program Description:

In this program, children will engross themselves in entomology (the study of insects) and search for clues to help crack a case. They will have the chance to inspect fluorescing minerals and see how simple machines lighten your load. They will also discover why science is the real star of the big screen and move out of the way of motorized toys. Finally, they will stage a statically charged indoor storm and go on a nutrient hunt.

About Mad Science®

Mad Science® is the world's leading science enrichment provider, delivering unique science experiences that are as entertaining as they are educational. Mad Science encourages scientific literacy in an age when science is as vital as reading, writing and arithmetic.
