

Southeast Regional Occupational Program

Partnership is an educational tool that is integral to the success of ROP. Business partners can enhance ROP/CTE courses in a variety of ways including donations of time, expertise, equipment, job shadowing/internships, mentoring, and monetary contributions. Private sector businesses have been a long time partner of Southeast ROP. Each of our business partners serve as an advisor at our annual Advisory Committee Meeting. These advisors play an integral role to ensure our courses meet business and industry standards and current labor market demands.

Business involvement brings real world knowledge and skills and provides our students with work-based learning experiences and exposes students to experiences and insights they would not otherwise receive. In return, business partners help shape the future of their industry by contributing to the education and skill sets of students who one day will become members of the workforce.

Southeast ROP has approximately 300 businesses that participate in our internship program by offering their facilities as training sites for ROP students. Many businesses also donate equipment and supplies for student use. This ensures that ROP students are college and career ready!

Here are some of our Distinguished Business Partners:
