# CONFIDENTIAL HEALTH CONCERNS LIST 2018 - 2019

**PLEASE NOTE NEW PROCEDURE:** Students with health concerns are listed on Q. Each teacher has access to view the health concerns of their assigned students on Q. To view your student's health concerns: go into Q, go into Teacher Connect, click on the medical symbol to view the health concerns, and click on the Note Pad to read the health recommendations.

When you schedule a field trip, notify the school nurse to make arrangements regarding medication and/or necessary accommodations for students with health concerns. Students with breathing difficulties such as asthma may have allergies to animals found at the fair, petting zoos and farms. Also, the nurse will need to be notified two weeks prior to the field trip to make arrangements and train staff to give the required daily medications, emergency medications and/or provide specialized health procedures such as diabetic care.

**Please read the attached "General Health Concerns Recommendation" sheet. Contact the school nurse if you have any questions. If you are aware of a student in your class with a health concern or one who takes medication, please contact the school nurse immediately.**
