

Attention Robinson Parents/Guardians:

All adult must have a TB test on record with the health office, per district policy, in order to volunteer on campus . This includes parents, relatives, and anyone (e.g. nanny) who volunteer in the classroom or on campus. TB test results are valid with the site for 4 years from the date of test. It is the volunteer's responsibility to turn in and renew their TB test result. If you do not have a TB test on file with the Health Office, you cannot volunteer with the classroom until one is turned in. Please turn in your TB test results ASAP. If you have a TB test on file with the Health Office and are not sure of the expiration date, please email the health office to check. If the results are expired you will need to be retested and turn the results in ASAP.

Thank you for your time and cooperation in this matter.
