

We asked some of our monthly donors why they choose this way of donating and this is what they told us:

*“By being able to spread (our donation) out over 12 months we are able to give a greater amount than if we made one lump payment. We are able to give back more to a school that did so much for our kids than we will be ever able to repay, but we sure are going to try.”*

— Michael and Carla Bies

*“We love St Francis and understand that donations are important for the school. We donate monthly because honestly, it is easy. It isn't a whole lot of money, but we don't miss it either. We wish we could give more.”*

— St. Francis of Assisi School family and Parishioners

*“The reason I donate monthly to the school fund is because I view it as an obligation to the future of the Catholic Church. We need to encourage Catholic education to the best of our ability.*

*It is just easier for me financially to donate monthly instead of one lump sum and somehow I feel able to make a larger donation that way.”* — St. Francis Parishioner

*“We LOVE St. Francis School for our son and wish that we could give so much more to help with the everyday cost. If we were to give a one-time donation it would have to be smaller because of our tight budgeting needs. The option to give monthly helps us give more over time and stay within our budget. It makes us happy to give to a school that has done so much for our family and specifically our son who thrives academically and socially. We will continue to give even after he graduates because of the dedicated teachers and administrations that go above and beyond to love and guide the students each day.”* — Lisa and Fil Tribble
