

Authorization Form and Procedures for Treatment of Bee Stings

The following is standard school district procedure for anyone stung by a bee or insect:

- Remove stinger if visible
- Apply sting kill swab
- Apply icepack
- Observe the student closely for 15-20 minutes (Monitor in classroom for another 15-20 minutes)

***Any student who is in respiratory distress will be given an Epipen and will be transported by an ambulance to the nearest Emergency Room!**

.....
Please check the type of reaction that your child has exhibited to bee stings or insect bites;

_____ My child has never been stung.

_____ My child has localized reaction (swelling or redness at the site of sting).

_____ My child has not reacted severely, but there is a strong family history of reactions
(Mother, Father, or sibling has a known severe reaction)

_____ My child has a severe reaction (difficulty breathing, generalized swelling, redness, numbness, hives, or itching)

*Describe your child's reaction. _____

.....
If your child has a reaction to bee stings or insect bites, please check the procedures to follow:

_____ Follow routine school district policy for bee stings.

_____ Notify parent at once

_____ Give medications prescribed by my child's physician (The parent must provide written orders from the physician.)

_____ Rush my child to the closest medical facility immediately.

_____ My child's physician has ordered an anaphylactic kit to be administered by the School Nurse, if she is available. (Parent will provide necessary kit)

*Special instructions _____

*May we give your child Benadryl for a localized reaction? _____ Yes _____ No

Parents, please make your child aware of his/her bee sting allergy and if the need to inform someone of having been stung.

Name of child _____ Grade _____

Signature of Parent/Guardian _____ Date _____
