1. Responses to Vendor Questions.

New Haven Unified School District  
Akur Varadarajan

---

Co-Superintendent/  
Chief Business Officer

**ADDENDUM NO. 1**

**NEW HAVEN UNIFIED SCHOOL DISTRICT  
REQUEST FOR PROPOSALS #748  
PURCHASE OF NEXUS 7 TABLETS  
FEDERAL RACE-TO-THE-TOP GRANT (RTTT-D)**

1. Sufficient quantities of the 32GB model may not be available. Can the bid focus on the 16GB model?

**The 16GB model will meet our needs. Please refer to Item # (b)(2) of (III) Special/ Technical Requirements:** . *“If a manufacturer, brand or make offers Item #1 in both a 16GB and 32GB internal storage configuration, please quote for the full quantity in both configurations. The Business Office will make a decision to purchase the full estimated quantity in one or the other of the configurations.”*

2. If a wired keyboard isn't available, would bluetooth work?

**Bluetooth is problematic for classroom applications of multi-user devices. If a USB case/cover/dock option isn't available, this could be addressed with a Micro USB Host OTG Adapter Cable, keyboard, and stand bundle. However, an all-in-one solution is preferred.**

3. Are you only interested in Android devices or would you entertain bids for Windows based tablets as well?

**We are interested only in Android devices, as they interface well with our Google Apps environment.**
