

Reimagine Learning

What if high school students were exposed to a multitude of careers and opportunities, industry skills and potential employers through classroom speakers, site visits, job shadowing and internships? What if students saw the purpose of their courses and felt more prepared for life after high school?

The Academies of Center Line will offer students all of this and more:

- Relevant and rigorous curriculum
- 21st century skills such as critical thinking, communication, and technology skills
- The opportunity to learn in the context of related career fields
- The possibility of career certifications
- Advanced Placement courses, dual enrollment, and enriching electives
- More engaging curriculum and instruction
- Most importantly, preparation for college, career and life after graduation

"It Makes You Think"

"To show a high school student real world applications to what they are learning in class, and engage them in the process with something they are interested in, creates an opportunity for deep and meaningful learning. I wish that academies had been offered when I was in school."

*- Robert Binson
Mayor, City of Center Line*

"The City of Center Line is proud to be a partner with the Center Line High School's Career Academies."

*- Dennis Champine
City Manager, City of Center Line*

The Freshman Academy

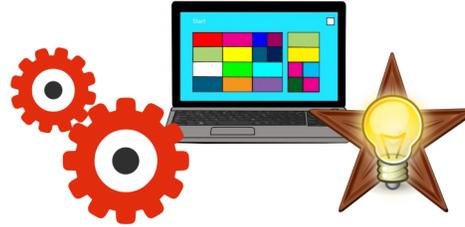

Starting Fresh and Finishing Strong

The Center Line High School Freshman Academy provides a holistic and supportive transitional environment from middle school to high school. Students receive exceptional support from teachers and staff members in a small learning community. Each teacher has the ability to work closely with one another and to develop **STRONG** relationships with students.

We aim to provide a climate and culture where our students are the focus, and they know it!

As freshman, students will strengthen their knowledge and skills, as well as, explore their interests and possibilities. In addition, students will choose an Academy and Pathway of study for tenth through twelfth grades to experience real-world learning opportunities, preparing them for a future of success.

The Academy of Industry, Technology and Innovation

Pathways
