

Mr. & Mrs. Benson - Value of Community and Small Class Size

We chose All Saints Catholic School for middle school because of the small class sizes, wide variety of opportunities for leadership, and the ratio of students to teachers. Students are given individualized attention by a family of teachers who know and truly care about them. Your child is not just a number at All Saints, and the teachers are deeply committed to the students' academic and spiritual success. We also feel it is important to have the daily religious education with focus on prayer, the Commandments, and serving others through community service, at a critical time in a child's development of self and lifelong faith foundation.

Additionally, All Saints is an academically challenging school emphasizing core subjects, as well as Religion and Spanish. Students are also able to further pursue areas of academic interest through Math Masters, STEM Fair and creative writing opportunities and contests. There are wonderful extra-curricular activities offered at All Saints as well. Some of these include Band, Choir, Robotics, theater experiences, and many athletic opportunities such as volleyball, soccer, cross country, and basketball. The All Saints school community is an outstanding group of people, many of whom we call friends, and we have common goals, values, expectations and a shared faith.
