

Video Production 1

Film and Broadcast

Video Production 1 is an introductory course highlighting of the visual and audio media world. Students learn the fundamentals of video, film style and audio production using video equipment and software. Students gain knowledge and experience in single camera **Film Style, Audio**, as well as **Multi-Camera Video Production** with extensive project based assignments.

This class offers students more than just experience in the various types of video production; students also learn about film history, careers, and the appropriate colleges, universities, where they can pursue their specific interest and creative passion. This class is great for those students who are interested in getting the *knowledge, skills, and experience* they need to get a head start in their career.

This course breaks down movie “magic” and teaches students the science, craftsmanship, and art that makes it all happen. If you have any questions, check with your counselor or just swing by room 60

Video Production 1

Recommendation: All Students

Course Description: This course provides a project-based video media program which guides students to achieve the standards in the Arts, Media and Entertainment Pathway of career technical training by providing students with the technical instruction and practical experiences for aspiring video and film makers in the production of film, video and new media projects. Students experience both the creative and technical aspects of film making in conjunction with learning about historical and contemporary traditions and conventions. Students are instructed on the three stages of project creation.
