**SUBJECT: SAFETY CONDITIONS AND PROGRAMS**

The Board of Education recognizes the district's responsibility for ensuring the safety of all students, staff, and the community in school buildings or on school grounds, and/or participating in school activities.

The practice of safety will be considered an integral part of the instructional program through fire prevention, emergency procedures and drills, driver education, traffic and pedestrian safety, and other preventative measures.

Each principal will be responsible for the supervision of a safety program for his/her school. Each classroom teacher is responsible for the safe and proper use of all instructional materials and equipment by students in his/her classroom.

The safety program may include, but not limited to, in-service training, plant inspection, fire prevention, accident record keeping, driver and vehicle safety programs, emergency procedures and drills, and traffic safety programs relevant to students, employees and the community.

It shall be the duty of the Board of Education to provide inspections and supervision of the health and safety aspects of the school facilities.

Eye safety devices are to be provided by the School District for the protection of employees, students and visitors, and worn in the technology education classes and labs when activities present a potential eye hazard. The Superintendent or his/her designee will insure that these devices are properly repaired, cleaned and stored to prevent the spread of germs or diseases after individuals use them.
