

Joining the MUSD wireless network:

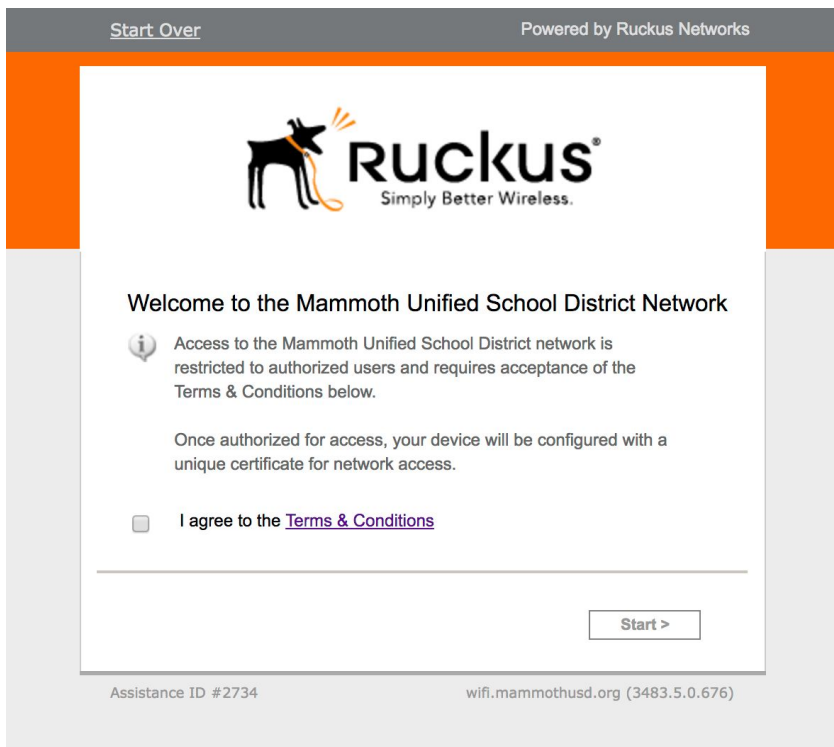

Find and connect to the MUSD ssid

Open your web browser (I.E. Chrome, Safari, Internet Explorer, etc.) and if you have not already been redirected, paste into the url bar:

<https://wifi.mammothusd.org/enroll/MammothUnifiedSchoolDistrict/onboard/process>

Your screen should now show the welcome page:

Select the checkbox to agree to the Terms and Conditions then select the Start button

Choose your appropriate group:

To access the secure network, follow the instructions below based on your computer's operating system.

Mac OS X

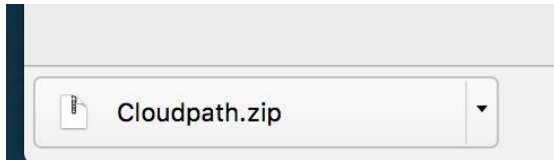

Download for Mac OS X

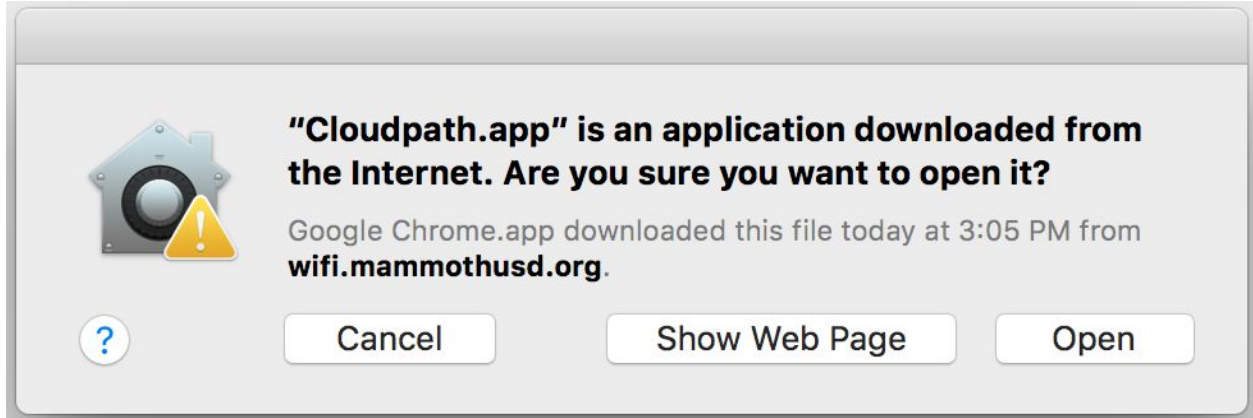

Cloudpath.zip

Chrome Users: After clicking the button, the file will appear along the bottom of the browser. Click the **Cloudpath.zip** file and the Downloads window should appear. In the Downloads window, locate the Cloudpath folder and double-click to open it. Then, double-click Cloudpath to launch the application.

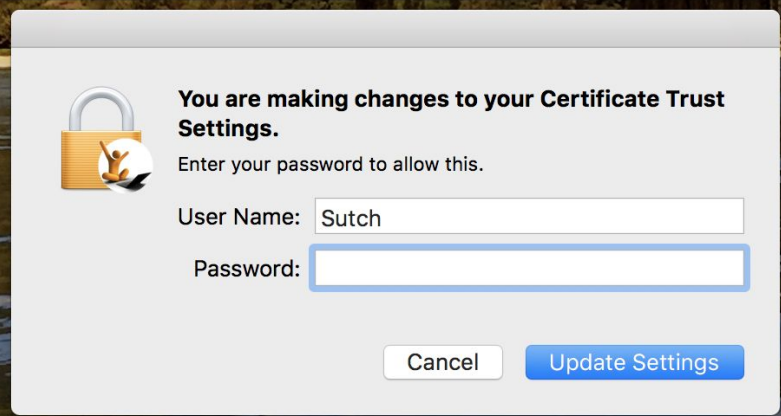

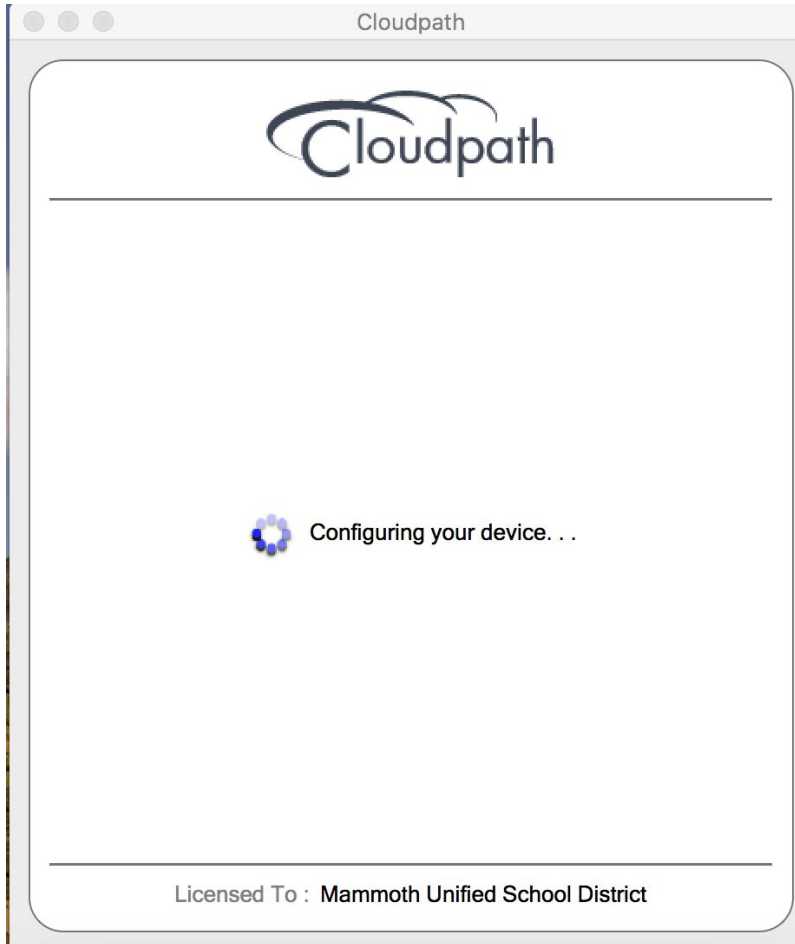

[Show all operating systems.](#)

(FOR MAC USERS) After expanding the file locate the cloudpath folder and double click the cloudpath.app

Select Open.

Type in your password to allow the install to take place and select Update Settings.

You will now have the 3 SSID's for all school locations including the District Office. You may safely forget/remove the MUSD network from your device.

The MUSD SSID is a walled garden. It has limited connectivity to a few websites for onboarding purposes only.

The setup process is similar for iOS devices. The one exception is that your device will prompt you to allow Cloudpath to install a certificate and have access to your settings.

Android devices will prompt you to install the cloudpath app. After installing the application you will be able to continue the installation of the other networks.
