INSTRUCTION - HOMEWORK

Homework Policy

Homework is to be defined as “work assigned which may be done outside of each teacher’s classroom environment.” Homework is to consist primarily of formative assignments (i.e. quizzes, practice, initial drafts, or questions that arise from instruction) intended to reinforce knowledge learned in the classroom. Formative assignments are assignments that occur during the learning process and indicate to the teacher what the student knows as well as what material(s) need to be re-taught.
