

Automotive Technology

The Automotive Technology Program provides a comprehensive, competency-based applied technical training curriculum in the areas of automotive service and repair. Graduates of the program are prepared for entry-level employment as technicians in the field of automotive service, repair, and maintenance. There is a high demand for qualified, well-trained automotive technicians. Depending upon the number of years of experience in the automotive field, income potential can range between \$30,000 and \$100,000 per year.
