## **Sitting TIPS**

### **I. Face/Skin**

- Don't worry about blemishes (professional photographers can retouch to "fix" imperfections).**
- Make sure to groom your eyebrows and apply makeup carefully. (Remove stray hairs 12 hours before appointment to avoid swelling).**
- If your skin tends to be oily, bring paper blotters to remove the oil prior to and during the session.**
- Bring lip gloss or lip balm to keep lips moisturized.**
- Avoid tanning conditions (tanning booths or long exposures outdoors) the week before your appointed time—it can make your skin swell and appear red in the pictures.**

### **II. Hair**

- Because the head shot requires lots of lighting directed toward the face and head, if you color your hair, make sure you have it done within a couple of days before the appointment. Roots get highlighted under these lighting conditions.**
- Get haircuts about a week before your appointment**
- Guys—give yourself a clean shave the day of the appointment, or a neat trim to your beard, if you have one.**

### **III. Dress**

***Use clothing to accentuate your best features and style. Select your outfits in plenty of time to have them clean, pressed and ready for the sitting.***

- Choose colors that flatter your skin tone and eye color**
- Avoid faded fabrics and white (especially if you have a light skin color, and in the cooler months when you've been out of the sun)**
- Avoid bold stripes or distracting patterns, as they take attention away from your face**
- Choose clothes that fit you right—not too tight, not too big**
- Dress up with style and fun accessories.**

**Come prepared 15-20 minutes before your appointment time, with your outfit and hair/make-up done.**
