

MES Traffic Flow for 3:25 Release

Madisonville Elementary has changed classroom areas to better serve our students. This makes it necessary to change our exit doors and simplify our traffic flow. All First graders and those younger students riding with them will exit at the front of the building. All Second graders and younger students those riding with them will exit and wait on the car side. All Kindergarten students and younger students riding with them will exit their side doors and wait on the car side. Only Pre-Kindergarten students (these students are ones not riding with an older child) will exit through the back double doors to wait for their rides. We have approximately 600 students on our campus so we ask that you not request that your child be sent to another pick up area. When we use a pattern know by all school employees, then all school employees are better able to determine where our students are to travel when school is dismissed.
